## Virus Mitigation HVAC Products

### Increased Fresh Air Inside Building

Air handling units; packaged rooftops; evaporative condensing chillers and rooftops; packaged pump systems

Custom air handling units and heat transfer package solutions

Custom air handling solutions including build-on-site replacement units

Variable refrigerant flow (VRF) solutions for commercial and light-commercial applications

Commercial packaged rooftops; air handling units and condensing units

Heating and energy recovery units, using Plate heat exchangers, Enthalpy wheels, or Desiccant wheels.

Displacement ventilation chilled beams; custom sheet metal accessories for terminal

Commercial air handling units

Compact, efficient energy recovery units offering fast and easy retrofit or closet mounting, classroom and school sound sensitive unit ventilators

DOAS, MUA, exhaust fans and kitchen ventilation

### Air Purification

Indoor air purification; bipolar ionization system

### Air Flow Measurement

Airflow and pressure measurement controls; fan array controls

### Ultraviolet (UV) Lights

UV Light options available for air handling units, energy recovery ventilators and make-up air units, including 4" MERV 15 filtration

### Dehumidification

Total environmental desiccant dehumidification solutions

Indoor pool dehumidification systems

UV cleaning systems; UV germicidal light fixtures for HVAC; lamps and equipment coating

Humidity and temperature control for indoor grow rooms
